

Why CFESA® ?

CFESA promotes the highest standards of professional service

Training

Certification

Maintenance

Installation

Company Certification

CFESA's Company Certification program is designed to raise the bar of quality in the foodservice industry and to distinguish the companies that provide superior service. All Certified companies are required to re-certify every three years.

Company Certification requirements include:

- Financial Stability
- Continued Education and Training
- Industry Participation
- Industry Relations
- Professionalism

Technician Training

CFESA offers technician training programs from basic to advanced. Online training programs and hands-on courses ensure that technicians are able to repair a broad range of commercial foodservice equipment and are well-versed in safety precautions.

Preventative Maintenance

Quality Preventative Maintenance programs are customized to your establishment and equipment. They must be performed by qualified technicians. CFESA servicers offer dependable and reliable PM programs that can save you time and money.

Technician Certification

CFESA has established a technician certification program where technicians are tested and certified only upon successful completion of an exam. CFESA offers certification in Electricity, Gas, Steam and Refrigeration. Once a technician has passed 3 of the 4 tests, they are awarded Master Technician Certification status.

Equipment Installation

Installation services offered by CFESA members range from the replacement of single pieces of equipment to the complete installation of new facilities. Save time and trouble and protect your warranties - have your equipment installed by a factory trained CFESA member.
